CYG WAYON Statement on Conflict Minerals

Conflict minerals are designated for those minerals of tin, tantalum, tungsten and gold (3TGs) which originated in the Democratic Republic of Congo (DRC) or adjoining countries, the profits from the sale of which allegedly finance continued armed conflicts in these countries. CYG WAYON takes this issue very seriously and takes actions to address it.

The issue of conflict minerals is well known in the electronics and other industries and is extremely complex. Resolution will require the commitment and cooperation of businesses, governments and non-governmental organizations (NGOs). CYG WAYON does not procure nor support the use of conflict minerals. CYG WAYON requires all suppliers not to procure conflict minerals. CYG WAYON also asks suppliers to cascade this requirement to sub-tier suppliers.
